

INX Announces Deployment of Unified Communications and Wireless Solution for United Regional Health Care System

HOUSTON--(BUSINESS WIRE)--INX, Inc., (NASDAQ:INXI - News) announced today that it has begun deployment of a unified communications and wireless solution for United Regional Health Care System in North Texas.

United Regional Health Care System (URHCS) has selected INX to deliver a unified communications and wireless solution that will replace its legacy TDM phone system and upgrade the wireless communications infrastructure. INX is designing and deploying an IP Contact Center and Call Manager solution that, when completed, will allow United Regional to provide better patient care through call center applications and improved communication. By increasing bandwidth on their network and upgrading their wireless network, United Regional can deliver more efficient communications between clinicians, patients and families. Initial deployment began in 2008 and is scheduled for completion in early 2010. The project involves three sites, including a new install at the New Bridwell tower, completed in August. The solution includes the Cisco Systems' Unified Communication platform and call center application.

"INX's proven expertise in the area of technology healthcare solutions is important to why we forged a strong partnership that will allow us to leverage advanced technology to meet critical business objectives," stated Jerry Marshall, Director of Information Services and Telecommunications for United Regional. "INX delivered on their promise to deploy advanced technologies that will enable strategic business benefits for United Regional and allow us to better serve our customers and provide excellent medical service to our patients."

Mark Hiltz, President and COO of INX stated, "We are pleased to work with United Regional in helping them achieve their goal of improving patient care. INX is committed to partnering with United Regional strategically to address the complex challenges faced by the healthcare industry."

The project was valued at approximately \$1,600,000 in product and services revenue for INX.

About INX Inc.:

INX Inc. (NASDAQ:[INXI](#)) is a leading U.S. provider of IP communications and data center solutions for enterprise organizations. We offer a suite of advanced technology solutions focused around the entire life-cycle of enterprise IP network communications and data center infrastructure. Our services are centered on the design, implementation and support of network infrastructure, including routing and switching, wireless, security, unified communications, and data center solutions such as storage and server virtualization. Our customers include enterprise organizations such as corporations, as well as federal, state and local governmental agencies. Because of our focus, expertise and experience implementing and supporting advanced technology solutions for enterprises, we believe we are well positioned to deliver superior

solutions and services to our customers. Additional information about INX can be found on the Web at www.inxi.com.
